Total number of inbound Customer Services contacts	Plan is Best	Year to Date	42,179	39,984	48,686	51,246	46,819	Contact remained unusually high for the summer months. We believe this was linked to the long period of very hot weather which resulted in high contact volumes to the Adult Helpdesk. Face to face contact was high in July and Sept due to increased meetings and full Council Meeting. Contact in August reduced dramatically which is in keeping with trends in previous years. Interestingly the contact via web forms increased in August - this might be linked to intermittent access issues following on from IT upgrades.

% of Healthy Lifestyles customers demonstrating a significant improvement in their mental wellbeing score	Bigger is Better		82.0 %	77.0 %	69.0 %	62.0 %	47.0 %	<p>There has been a drop in the number and percentage of customers seeing a significant improvement in their mental wellbeing score since last quarter – 81 (47%) in Q2 compared to 131 (62%) in Q1.</p> <p><i>N.B – this is a subset of those people receiving support from the service as not everyone agrees for their wellbeing to be measured</i></p> <p>Improving mental wellbeing is not a primary function of the service. However, we included this as an indicator to monitor what, if any, impact a lifestyle change intervention by the service could have on mental wellbeing.</p> <p>There are a number of things that impact on someone's mental wellbeing so it is difficult to disaggregate the impact that the service can have from external influences. However, we will track this indicator to gain more insight on the wider impact the service can have outwith its primary function.</p> <p>However the data show that a significant number of those accessing the service to improve lifestyle behaviour also see an improvement in their mental health. 81/173 (47%) saw a significant improvement 33 (19%) showed some improvement 37 (21%) remaining the same. 22 (13%) got worse</p> <p>So in total 114/173 (66%) experienced some improvement in their mental health compared to 22 (13%) that experienced a drop in their score. This demonstrates that although the services prime objective is to improve physical health it can also positively impact on the overall wellbeing of service users.</p>
% of all Healthy Lifestyles customers who achieve a significant risk factor improvement	Bigger is Better		71.0 %	69.0 %	83.0 %	73.0 %	76.0 %	<p>High numbers of service users continue to make behaviour changes that will impact on their health with 852 / 1125 (76%) of users achieving a significant improvement. Service users are contacted within 2 days, see the same coach throughout their programme and coaches are trained in motivational interviewing and see people at a place that is convenient to them. I believe that this approach increases the likelihood of a positive outcome.</p> <p>Of the 273 that did not meet the threshold for significant improvement 189 (17%) made some improvement in achieving their behaviour change goal.</p>

% of children who received a 1 year check by 1 year	Bigger is Better		56.0 %	79.0 %	78.6 %	78.1 %	82.1 %	<p>PLEASE NOTE the new data set from Q1 onwards can not be directly compared to the previous 2017/2018 data reported. This is due to a change in the methodology used to calculate the indicators. This will ensure that data reported nationally and locally are aligned. Q1 reflects some delays in delivering universal mandated checks within timeframe due to prioritising increased safeguarding demand. Public Health are working closely with GCS, the CCG and Children's Services to improve safeguarding pathways and identify resource to reduce demand on the PHN service</p> <p>If a family identified for UP or UPP does not attend review, they are engaged by the service and followed up with an opportunistic visit to ensure the review takes place even if its out of the 12 month timeframe. If other known agencies or organisations are involved, the service would communicate with them to identify any concerns or a change of details. As a further safeguard all children in families receiving the UPP and UP service are discussed by Health Visitors at a monthly extended allocation meeting.</p>

A significant proportion of those inspections have been targeted at those schools that were vulnerable. As a result, the % of children attending good or better schools has decreased. However, the LA is awaiting the inspections of several schools currently judged to require improvement. When those inspections take place, it is expected that this figure will increase and be closer to the target. There are high levels of support and intervention from the LA for all schools causing concern and those where standards are lower than they should be.
% of pupils attending good or outstanding secondary schools	Bigger is Better	Snapshot	89.5 %	82.4 %	82.4 %	80.4 %	80.4 %	91.0 %	▲ The schools that are currently judged to be less than good are large schools each of which will account for at least 3 percentage points. There are 3 stand alone academies currently judged to require improvement: St Peter's, Farmor's, Cleeve. It is hoped that these schools will be reinspected in the next year by which time they will each be able to demonstrate a good level of educational provision. Outcomes in each of the schools have improved this year. More recently, Archway School has declined from Good to RI. Forest High (sponsored academy) has been removed from special measures to RI. It will be some time before these schools are reinspected as they are subject to the OFSTED scheduling. Nevertheless, these schools are improving. The highest concern is Gloucester Academy which is in special measures and progress is slow.

SR2.2	The cumulative impact of service pressures, particularly increased demand in relation to the care of vulnerable Children and Adults, and the under delivery of Demand Management programmes and saving plans designed to address the inherent over-spend positions, result in a major over-spend in 2018/19.	Walker, Jo	High 25	Moderate 8	Moderate 8	Low 4	Moderate 8	High 16	⬆️	Continued demand pressures within Children and Families has resulted in a significant overspend of 6.3 million being forecast within Children and Families in 2018/19.
SR2.4	Reductions and changes to future funding in 2019/20, 2020/21, 21/22. Risks and uncertainties relating to NHS funding make it impossible to set a robust and deliverable budget without impacting significantly on Core Services. SR3.1	Failure to ensure technology managed by ICT (including communications abilities) remains fit for purpose.	Walker, Jo	High 25	Moderate 10	Moderate 10	Moderate 10	Moderate 10	Moderate 10	➔	The ICT Service is currently reviewing the ICT Strategy & Roadmap 2013-18 to inform the delivery of a new strategy & roadmap in consultation with business leaders and aligned to both the emerging digital business strategy and the council strategy. The continued investment in modern, up to date ICT equipment and services will continue in 2018/19 supplemented by several targeted MTFS bids which have been submitted to address unavoidable system upgrades and support the council on its digital journey.
SR3.2	Failure to protect the council's key information and data from Cyber Attack.	Burns, Jane	High 25	High 15	High 15	High 15	High 15	High 15	➔	The council receives cyber attacks on a daily basis. Whilst there have been no reported successful attacks against the County Council data network, "ransomware" malware infections are still the most prevalent type of cyber security attacks in the UK. It is critically important that all parties remain vigilant in this area both from a technological as well as a user awareness perspective. In light of the growing awareness of the risks presented by cyber-based crime ICT have sought to strengthen our cyber defence platform within this years MTFS bid submissions.
