

Inspector's Agenda and Supplementary Questions: Issue 6

Agenda

- 1 Opening remarks
- 2 Is there any flexibility in the plan?

Having read the further submissions the following questions need to be addressed by the Council, and others as appropriate, **at the Hearing session. Unless specifically requested by the Inspector via the Programme Officer, no further written statements should be supplied in response and any that are will be returned by the Programme Officer.**

Agenda Item 2

1. CD13.16 proposes no modifications to the submitted monitoring framework. My understanding of para 3.1 is that if, for example, policy WCS4 fails to deliver, say, the required residual MSW capacity by 2015 on one of the 4 sites allocated, the plan will need to be reviewed. Is this correct and, if so, how does this build in any flexibility?
